Personal Profile

An experienced and ambitious software developer with over 10 years of experience building web applications, specialising in enterprise application development and front-end UI implementation using Angular. Alongside extensive front-end expertise, I have understanding of back-end development and experience delivering solutions.

Currently leading UI development across projects and prototypes, with responsibility for implementation, user experience and front-end technical direction. I take pride in producing high-quality work, solving problems independently and contributing positively to both projects and the wider team.

Now looking to take the next step in my career, expanding further into full-stack development and AI-driven software engineering. Particularly interested in embracing modern technologies, AI tools and evolving development workflows to improve efficiency, enhance software quality and deliver solutions beyond traditional approaches. I value thoughtful communication, meaningful collaboration and continuous professional development, while remaining open to new perspectives and opportunities to learn.

Key Skills

Technical Skills

- Excellent knowledge of HTML, CSS, SASS and Typescript.
- Creating enterprise SPA's using Angular.
- Experience with MySQL, SQL, Postgres and MongoDB databases.
- Git, SVN for version control.
- Creating applications and API's with Node, NPM (Express and NestJs for API's).
- Typescript and JavaScript testing libraries.
- Utilising third party API's and Libraries to improve experiences.
- Feature flagging and Branch deployment.
- SCRUM practices and methodologies for application development (JIRA/Gitlab issues and sprints).
- Using AI tools to improve workflows and productivity.
- Creating and running Docker images.
- Using various CLI tools for development.
- Experience in areas of AWS, GCP and Azure.

Personal Skills

- Strong desire and enthusiasm to learn and improve to attain a higher level of competency.
- Creative bursts with a strong attention to detail.
- Strong tenacity to overcome challenges and obstacles.
- Works well under pressure and working towards deadlines.
- Clear communicator, can work well independently and within a team.
- Handles criticism constructively and uses it to improve.
- A professional attitude in the workplace.
- Focused and easy going by nature.
